

A STORY NOT TOLD - UNTIL NOW!

In a bittersweet blend of science and yarn, Carter Niemeyer takes us back to 1996 on a heart-pounding, eye-witness adventure to add ten more wolves—the Sawtooth pups—to Yellowstone’s newly reintroduced wolf packs.

So much could go wrong. So much *did* go wrong. But in the end, the other ten wolves helped change the character of Yellowstone’s wolves forever.
